📍 **Home:** Wello sefer, 1000 Addis Ababa (Ethiopia)

ABOUT ME

I have a strong passion for technology and innovation. I believe that the theoretical knowledge should be tested and implemented on the real environment, and experimental research , technology transfer programs and practical work experience(Nokia-safaricom and Information metwork security administration) are the key elements for that. While I was in KIIT university, I participated in KIIT's tech grand fest as an organizing committee (Event manager), and I also participated in an innovation competition as a team representative. I think respect, integrity, and trust are the key values to succeed in any profession, so I give priority to those values in my study and future career.
Studying in a Competitive and challenging environment I have contributed to the best of my ability for the advancement of **B.Sc. Degree In Electronics and Computer Science Engineering (Electronics, software Engineering, Computer Science,Hardware) and other related activities with CGPA of 8.82 out 10**. I believe this will give you my area of interest and I look forward to join your program thank you.

WORK EXPERIENCE

Junior IS.IT Officer
